KEY FACTS STATEMENT

PRIME MARKETS LIMITED

KEY FACTS STATEMENT

This Key Facts Statement ("KFS") provides a concise summary of key information regarding the services offered by the Company. It is intended to provide clients with a clear understanding of the nature, risks, and terms of our services before opening an account or engaging in trading activities. While this document may be used to compare this investment product with other products, it does not constitute and should not be regarded as marketing material.

1. ABOUT THE COMPANY

Website	www.goprimemarkets.com

2. NATURE OF OUR SERVICES

- The Company provides execution-only trading services. No investment advice, portfolio management, or recommendations are provided.
- Clients are responsible for their own trading decisions and strategies.
- The Company may provide market data, research, or educational resources for informational purposes only; these should not be interpreted as financial advice.
- Trades are executed via the Company's trading platforms and liquidity providers.

3. PRODUCTS AND PRODUCT DESCRIPTION

3.1. The Company offers Contracts for Differences ("CFDs"), which are leveraged derivative instruments that allow clients to take positions on price movements without owning the underlying asset.

3.2. Available CFD Asset Classes:

- Forex
- Metals
- Commodities
- Cryptocurrencies
- Indices
- Shares
- Futures

3.3. **Product Features**

- CFDs are bilateral, margin-based instruments traded over-the-counter (OTC), not on a regulated exchange.
- Clients may take long (buy) or short (sell) positions. Profit or loss is calculated as the difference between the opening and closing price, multiplied by the position size.
- Leverage allows clients to gain exposure with only a fraction of the notional value as collateral, magnifying both potential gains and losses.
- CFDs are designed for trading short- to medium-term price movements. There is no predetermined holding period.
- Clients are responsible for managing margin requirements and maintaining sufficient account balance to support positions; insufficient funds may result in automatic closure of positions.

3.4. **Intended Investor**

CFD trading is suitable for clients who:

- Understand leveraged and derivative instruments,
- Are aware of the risk/reward profile of CFD trading, and
- Have the capacity to bear the potential loss of capital committed to trading.

CFD can generate high returns as well as significant losses over short periods. Clients should carefully consider their financial situation, risk appetite, and trading experience before trading.

4. RISKS & WARNINGS

CFD trading involves substantial risk. Clients should carefully assess whether they understand these risks and whether they can bear potential losses.

- CFDs are leveraged instruments; trading may result in the loss of the full amount of capital invested.
- Margin requirements must be maintained to prevent forced liquidation of positions.
- Trading in CFDs is speculative and can expose clients to high volatility.
- CFD positions do not confer ownership of the underlying asset.
- Market conditions, global events, economic announcements, and liquidity constraints can result in rapid and significant price movements.
- Clients may incur substantial losses over short periods, including the full invested capital.
- Market liquidity or counterparty events may impact execution or position value.
- Clients should seek independent advice if they do not fully understand the risks involved.

5. COSTS & CHARGES

Costs associated with trading CFDs may vary depending on the product, market conditions, and trading platform. Clients are responsible for reviewing all costs and ensuring they understand their potential impact on trading outcomes.

5.1. One-Off Costs

- **Spread**: The spread is the difference between the bid and ask prices of the underlying instrument and represents a transaction cost incurred on each trade.
- **Commission**: Charged per executed trade, calculated according to instrument type and trade size.
- **Currency Conversion**: For trades denominated in a currency different from the client's account base currency, conversion costs may apply to both realized profits and losses.

5.2. Ongoing Costs

- **Swap / Financing Fee**: Positions held overnight may incur financing charges (swap fees), which may be positive or negative depending on the instrument and prevailing market conditions.

5.3. **Additional Considerations**

Additional charges may arise in specific circumstances, such as corporate actions on underlying instruments, adjustments due to market holidays, or exceptional liquidity events.

5.4. **Responsibility of the Client**

Clients are responsible for monitoring all applicable costs and ensuring account balances are sufficient to cover fees, margin requirements, and other obligations arising from trading activities.

6. OTHER RELEVANT INFORMATION

6.1. All trades executed with the Company are subject to the Client Agreement and relevant legal documents, which should be reviewed prior to trading.

6.2. The Company maintains regulatory and compliance oversight in accordance with Seychelles FSA requirements.

6.3. Questions regarding trading, costs, or any other aspect of our services can be directed to support@goprimemarkets.com.
